

# Full-Stack Developer – Recruitment Task

Convert the following mockup to a Vue.js application.

Use [CodeSandbox](#) as playground and send us link to your work.

## Requirements:

1. Application should be implemented as a Single Page Application in Vue.js framework.
2. For backend use API from <https://swapi.dev/>.
3. Use Roboto font (from Google Fonts) and [this lightsabre image](#)<sup>1</sup>.
4. Make application responsive using your best judgement.
5. Suggest expand/collapse effect in the list to see details of an employee.
6. Ensure that the elements work and display correctly in the most popular browsers.

## Optional bonus task:

- Allow to change order in the list by Drag&Drop effect.
